Ornamental Garden Pond

Build this wonderful bridge and pond for your favourite Sylvanians as it would make a great feature in any garden.

INSTRUCTIONS

- A. Glue the other two pages onto the back of a cereal box. Then cut out the sections 1-6.
- B. Carefully bend back the little orange tabs shown either side of section 3. Join sections 1 and 2 together by sticking these tabs around the dotted line in the middle of section 1 and then around the dotted line in the middle of section 2. Do this carefully otherwise the bridge will wobble!

C. To assemble the garden, place section 5, Hedge upright along the white line marked x (a piece of plasticine at the back will support it firmly).

D. Next, place the bridge in position over the pond, again using plasticine as support.

E. Cover all brown portions with mounds of coloured plasticine to give a rockery effect.

F. To complete your garden, obtain some suitably shaped twigs and place in mounds marked T, to hold the 'tree' in place.

G. Place section 6, the lillipads and flowers on the pond. Bend them slightly to give the lilipads and flowers a 3D look.
